

iEnergizer Limited
(“iEnergizer”, the “Group” or the “Company”)

Pre-Close Trading Statement

iEnergizer Ltd, a leading software and services pioneer, issues the following update on trading for the year ended 31 March 2014. The Group’s full year results are expected to be released on 30 June 2014.

Overview

We have made satisfactory progress on our key priorities in the year, with good performances in our IT outsourcing divisions partially offset by slower progress in content delivery. Content delivery has been impacted in the short term by the completion of a significant, high margin XBRL* project which has left us with some short term surplus capacity. However, we have a detailed programme underway to reposition the division, increase returns and drive further cost efficiencies.

Outlook

The Group’s total revenue for the year ending 31 March 2014 will increase by approximately 2% over FY2013 but EBITDA will decline by approximately 7%, principally as a result of the impact of the high margin XBRL project on the comparative periods results referenced above. Looking to FY2015 it will take time to replace this high margin project.

While content delivery faces a year of transition, the Company has already begun to execute a multi-pronged global sales strategic initiative and shift towards high growth, high margin new services. Much of these developments will be shared with investors at the Company’s inaugural analyst and investor day later in this calendar year. While there remains a significant amount of work ahead we are encouraged by the progress made so far.

The scale of the order book continues to provide excellent visibility of future revenue streams across all business units. The project pipeline enters FY2015 at record levels and with strategic initiatives undertaken in the content delivery segment we expect new, significant long-term opportunities for the Group over the next six to 24 months to both extend our leadership position and accelerate growth.

Ends.
